

**Step 2:** Summarize the articles in your own words.

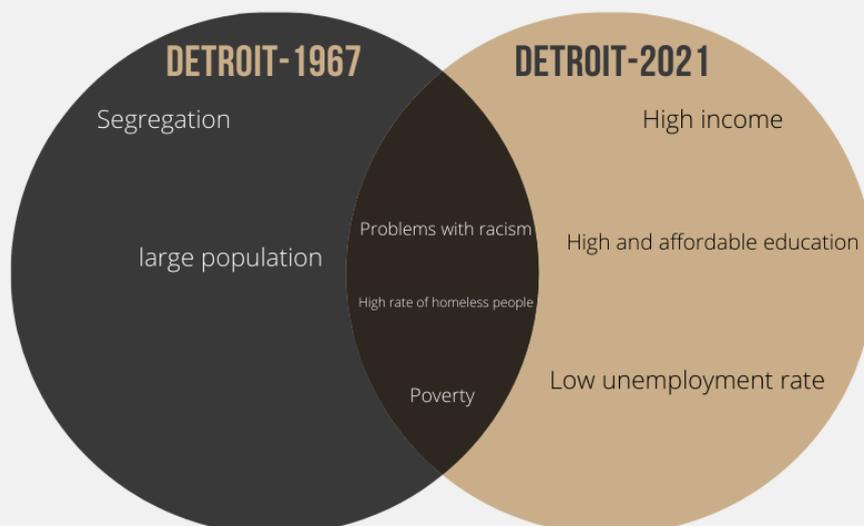

Even decades after Detroit experienced one of the greatest tragedies, in terms of racial problems in the history of the United States, Detroit remains a divided city, with good sides and bad sides, but above all, it is desperate to evolve after the problems of the past that haunt it until today, thus, the social problems that haunted Detroit in the past still present and cherished in its roots, and furthermore visible in the most diverse parts such as transportation, politics, ..., but beyond these social issues we see this division of the city better, being shown to us, on the one hand the Detroit economy is rising, and we have several philanthropic jobs, and on the other hand poverty remains the same, with no improvement in this issue and the expectation of improving social problems Detroit's population and population shows several problems to face and so it will be a slow process, but maybe fortunately even with Detroit facing these various problems it works is, that came from his turbulent past, maybe one day he will recover completely and thus rise up and leave his past only as history and no longer a current reality.

**Step 3:** Compare what is said in the articles about the state of Detroit, and compare it to 1967 Detroit (the time of the riots). This can be done by identifying the main idea of each article and then identifying the supporting details of each main idea.

**Step 4:** Compare and Contrast

Create a [Venn Diagram](#) that shows how Detroit is different and the same from 1967?

## EQUALITIES AND DIFFERENCES OF DETROIT FROM THE PAST AND FROM DETROIT TODAY.

How is Detroit the same/different socially, economically, racially, etc.?

Detroit demonstrates an evolution of its past in which, it maintains part of its problematic roots, such as racism and poverty, but which, with the help of the population, for example, has been working to overcome such problems, still having certain problems of racism for example, because this is a long process, that is, we still maintain certain problems characteristic of the 1967 Detroit, but little by little, and over time, more and more of its past is loosened, so that in the future, perhaps it will overcome the problems. more diverse from the old Detroit and evolve in the good factors of the 1967 Detroit.

What government decisions have impacted population shifts?

The government's measures aimed at rebuilding the industry and increasing the population of Detroit beyond its conditions, have a great impact on the population that for example is now getting more and more jobs, and moreover, Detroit is trying to recover its economy in which it would have a major beneficial impact on the population.

**Step 5:** What is YOUR opinion about Detroit and its health as a city? Use your research to back up your opinion!

Detroit is definitely not a healthy city, as it still shows stuck in its roots all the various problems of its dark and turbulent past, which greatly affect the city, but even so, despite all these diverse and diverse problems, it struggles, trying as much as possible to abandon the evil of its past, evolve, and rebuild the great power that was in the past, and so I still believe that Detroit will be able to rebuild itself, in case something big doesn't happen, even so, I believe it will take decades, but I believe it can get back on its feet.
